Lawmake Praveen

Web and App Developer

6381376043 | lawmakepraveen@gmail.com | [Website](#) | [LinkedIn](#) | [GitHub](#)

Summary

Seasoned Web and Mobile App Developer with two years of experience in React and Flutter. I have delivered "high level" scalable apps and websites. I have hands-on experience with AWS which involves deploying and scaling applications, enhancing performance and reliability in a "cost effective" manner.

In addition to development, I have successfully led teams for two projects. I have guided junior developers and interns in the development phase. As I am familiar with UI/UX principles it is much easier and convenient for me to reach the pixel perfect UI in mobile and web apps.

Experience

Team Lead, Web & Mobile App Developer (Flutter & React.js)

uSiS Technologies | 2023 - Present

Mobile App Development (Flutter)

Employee Self-Service (ESS) App – Frontend Team Lead

1. Led a team to create a feature-complete Employee Self-Service (ESS) application, making workforce administration easier and efficient.
2. Designed and implemented main features such as leave applications, pay slip downloads, and document uploads to enhance employee convenience.
3. Coordinated project planning, task distribution, and development cycles for on-time and quality delivery.
4. This product reduced request processing time by 200%, improving HR efficiency and employee satisfaction.

Warehouse Management App:

1. Developed a Warehouse Management App to ease inventory management across multiple properties and warehouses.
2. Enabled real-time inventory stock transactions, product queries, and request creation, improving operational efficiency.
3. Maintained compatibility across various devices so that there is seamless access on desktops, mobile, and tablets.

Waste Management App:

1. Developed a medical waste collection app with local storage using SQLite for offline data management.
2. Enabled Bluetooth connectivity that allows external weighing machines to calculate and transfer accurate weight to the mobile application.
3. Digitized medical waste collection and tracking processes using barcode scanning.
4. This app helped the company to cover more hospitals and clinics to maximize profit.

Event ID Card Printer App:

1. Created a real-time ID card printing solution for events, enabling on-site badge printing.
2. Integrated Bluetooth and Wi-Fi printer support for easy event pass printing.
3. Simplified event logistics and check-in processes to improve the attendee experience.
4. This app helped organizers onboard new attendees without hassles

Web Development (React.js)

1. Created a robust Admin Panel website as a complement to the Employee Self-Service (ESS) application for easy HR management and a good user experience.
2. Used React.js to build a user-friendly dashboard for managing employee data, access control, and analytics.

Skills

Flutter	Dart	React.js	JavaScript	Node.js
Express.js	Redux.js	AWS	MongoDB	MySql
HTML	CSS (SCSS)	JQuery	Figma	Framer

Tools and Management

Git	GitHub	GitLab	Jira	Open Project
VS code	Xcode	Android Studio	Cursor AI	Postman
Office 365	Google Workspace	Slack		

Education

B.Sc (2017 - 2020)

St John's College, Tirunelveli.

Additional Information

Languages:

Tamil (Native).

English (Professional Working Proficiency).

Certification:

Cognizant Agile Methodology.

The Complete Web Development Course by Udemy.
